## **MF provides full-scale “JPNAP Tokyo II Service”**

INTERNET MULTIFEED CO. (“MF”; Head Office: Chiyoda-ku, Tokyo; President and CEO: Koichi Suzuki) announced today that from April 1, 2008 the company will start providing full scale “JPNAP Tokyo II Service,” the second commercial IX (Internet Exchange) service in the Tokyo metropolitan area that MF began providing in January this year.

“JPNAP Tokyo II Service” is an Internet exchange point and is completely independent from the “JPNAP Tokyo I Service” currently being provided in the Tokyo Otemachi area. This service allows primary site distribution of customer networks in the Tokyo metropolitan area and topological redundancy and improves high availability and reliability of customer networks.

MF is committed to playing a pioneering role in continued growth of the Internet, providing services that support this growth and that contribute to improving the reliability of vital public infrastructure.

### **1. Service Overview**

“JPNAP Tokyo II Service” is an Internet exchange point and is completely independent, both logically and physically, from the “JPNAP Tokyo I Service” currently being provided in the Tokyo Otemachi area. This service offers the same service options, system configuration, high availability, and high service quality provided by “JPNAP Tokyo I Service.”
