### JPNAP Fukuoka service launches at QTnet data center

Tokyo, 20th October 2020: Japan's leading Internet Exchange (IX), JPNAP which is operated by INTERNET MULTIFEED, will launch a new JPNAP service, "JPNAP Fukuoka" service, at QTnet Fukuoka Datacenter 3 in January 2021.

JPNAP has been providing internet exchange services in Tokyo and Osaka, besides, we will establish a new independent internet exchange in Fukuoka, a core city in the Kyushu area, to provide JPNAP Fukuoka service.

In addition, the Fukuoka Datacenter 3 is a robust, reliable and base isolated data center that can withstand an earthquake with a seismic intensity of 7, and can provide a flexible network connection including JPNAP Fukuoka.

This enables the efficient exchange of increasing Internet traffic in the Kyushu area. We will also contribute to the decentralization of Internet interconnections concentrated in Tokyo and Osaka.
