INTERNET MULTIFEED CO.
Internet Initiative Japan Inc.

JPNAP Tokyo Service Launches at IIJ Shiroy Data Center Campus

INTERNET MULTIFEED CO. (Multifeed; Head Office: Chiyoda-ku, Tokyo; President: Koichi Suzuki,) announced today that it will add the Shiroy Data Center Campus (Shiroy City, Chiba Prefecture; hereinafter referred to as Shiroy DCC), operated since May 2019 by Internet Initiative Japan Inc. (IIJ; Head Office: Chiyoda-ku, Tokyo; President: Eijiro Katsu), as a base for JPNAP Tokyo Service, an Internet exchange (IX) service provided by Multifeed, and will commence the service in March 2022.

Multifeed has established a base for providing JPNAP Tokyo services, mainly in data centers in the Tokyo metropolitan area. By establishing a base in Shiroy DCC, businesses using Shiroy DCC and data centers in the surrounding Shiroy and Inzai areas will be able to connect to JPNAP Tokyo without having to prepare access facilities to the city center, and will be able to interconnect with content providers in Japan and overseas, as well as with Internet providers, to efficiently exchange growing Internet traffic.

IIJ is expanding the network at Shiroy DCC based on the concept of a network HUB that connects to various cloud services and data centers located in Shiroy and Inzai areas, etc. The establishment of the JPNAP Tokyo service provision base at Shiroy DCC will further enhance the value for customers.

Multifeed and IIJ will continue to work together to improve and expand services, support the promotion of digital shifts and the strengthening of the Internet infrastructure that supports them, and provide high-value-added services.
