INTERNET MULTIFEED CO.

JPNAP Tokyo service launches at MC Digital Realty NRT Campus

INTERNET MULTIFEED CO. (Multifeed) announced today that they will launch the NRT Campus operated by MC Digital Realty, Inc. (Inzai City, Chiba Prefecture), as a connection point for JPNAP Tokyo Service, an Internet Exchange (IX) service provided by Multifeed, and will start providing the service in May 2022.

MultiFeed is expanding its JPNAP Tokyo service in the Inzai area where many data centers are concentrated, as well as the data centers in the central Tokyo metropolitan area.

By utilizing a connection point at the NRT campus, the users such as cloud providers, content providers will be able to connect to JPNAP Tokyo without having to prepare access facilities to Tokyo metropolitan area. The connection at the NRT campus enables to interconnect with Internet service providers and content providers in Japan and overseas, and exchange Internet traffic efficiently.

Multifeed will be responsible for growing Internet traffic by enhancing and expanding IX services, contributing to the further development of the Internet and improving its reliability as a social infrastructure.
