JPNAP Osaka Service Launches at Equinix OS3

 INTERNET MULTIFEED CO. (Multifeed) announced today that it will add the Equinix OS3, the data center provided by Equinix Japan Corporation, to its connection point of JPNAP Osaka Service, the Internet exchange (IX) service provided by Multifeed, will commence the service in November 2021.

 Multifeed already provides JPNAP service in 4 areas in Japan, Tokyo/Osaka/Fukuoka/Sendai. But we will enhance our capacity by adding the connection point in the Osaka area in addition to the Tokyo area, in order to meet the demand of content providers and Internet service providers, such as improvement connectivity and dispersion of connection points in the Internet interconnection environment.

JPNAP Osaka will be connected to the following 5 locations:
・NTT Telepark Dojima 1st Building
・NTT Telepark Dojima Building 3
・NTTDATA Dojima Building
・Equinix OS1
・Equinix OS3
